

Overdenture and Locator Fixed CE Course

Christopher Concepcion

Course Description: Discover what a lab-driven workflow looks like for the success of your removable and fixed hybrid cases. Know what to look for and how to troubleshoot chairside.

Course Objectives:

- Understand how a lab-driven workflow will lead to successful cases
- Be able to successfully follow the overdenture workflow
- Be able to successfully follow the Locator Fixed workflow
- Explain the differences between analog and digital workflows
- Troubleshoot common issues and identify problems before they start

Christopher Concepcion serves as Technical and Sales Director at Arkalign, bringing over 25 years of leadership experience in the dental laboratory industry. A graduate with a background in law enforcement, Chris transitioned into the dental field early in his career and has since built a distinguished record as both an executive and a Key Opinion Leader (KOL) for leading global organizations. He has held senior leadership positions at 3M ESPE, Brasseler, Astra Tech, and Straumann, where he advanced initiatives in treatment planning, prosthetics, and implant solutions. His expertise and strategic insight continue to drive innovation, operational excellence, and strong partnerships across the dental community.
